

Specialists in Aerial Photography

Ascend Photography Ltd provides a digital imaging service, with photos taken from a totally different perspective. Going higher than the average cherry picker, and lower than full size aircraft, our electric radio-controlled helicopter is what makes it possible for us to take aerial photos and videos quickly without the huge expense. The ability to go over rivers and lakes means we can get to places that others can't, to get that elusive shot. Our chopper is quiet and does not emit smoke or fuel chemicals, enabling us to operate within rural, residential and commercial areas. The photos and videos are edited to ensure the best possible result and delivered to our customers on cd.
